LATEST NEWS

The World Elite Gathered in D.C., and Media Refused to Cover It.

April 22, 2026 By **Vigilant Citizen**

The 2026 Bilderberg meeting took place from April 9 to 12th at the Salamander Hotel in Washington, D.C., and exactly zero media outlets talked about it. Indeed, despite the magnitude of the event and its potential repercussions for the world, there was virtually no media coverage before, during, and after the meeting. Searching the web for information on Bilderberg 2026 is a harrowing experience because NOT A SINGLE mainstream media outlet has published anything about it, except for one article in The Guardian that is mainly about … the media not covering Bilderberg 2026.

The 2026 Bilderberg meeting took place at the Salamander Hotel in Washington, D.C., with heavy security and a complete media blackout.

What's even more absurd is that the Bilderberg included high-level representatives from media outlets such as CNN, Bloomberg, The Atlantic, and The Economist. And none of them even mentioned the meeting's existence. It is almost as if there is "a secret agreement between two or more people" to commit this media blackout … which happens to be the definition of a "conspiracy."

When the elite decides to push a narrative, all mainstream outlets spout out the exact same message, in complete unison. And when it decides to bury a story, a media blackout occurs. Even if the event is newsworthy.

And Bilderberg 2026 was extremely newsworthy. It gathered incredibly powerful people, including the Secretary General of NATO, the CEO of Pfizer, the Secretary of the U.S. Army, the CEO of Palantir Technologies, and dozens of others of comparable power and influence.

Some might say that the Bilderberg meeting is one of the most significant news stories of 2026. After all, its outcome will influence most world events in the coming months and years.

This is where important global decisions are made, which are then translated into laws and policies in countries around the world. And none of this is transparent. It all happens behind closed doors, with heavy security and a complete media blackout. There are no minutes of the meeting and no press release summarizing what was discussed. The only information available is a laconic press release on the Bilderberg website listing the topics to be discussed:

- Europe
- Global Trade
- The Middle East
- Russia
- Trans-Atlantic Defence-Industrial Relationship
- Ukraine
- USA
- Future of Warfare
- The West

With vague topics such as "USA" and "The West", they should have added an item saying "None of your business," because that's what they're really saying. In reality, they just talk about whatever they want, under complete secrecy.

That said, looking at the ultra-elite list of attendees, one can infer the kinds of discussions that were held. And, immediately, one word comes to mind: Collusion.

> Collusion is a secret, often illegal agreement or cooperation between parties—usually competitors or opposing sides—designed to deceive, defraud, or gain an unfair advantage over a third party.

Among the Bilderberg guests are many businesses that compete with one another and public officials with access to classified national information. However, behind closed doors, they all collude with the ultimate goal to control the masses globally.

Here's a look at the most significant attendees and the implications of their presence at Bilderberg 2026.

Controlling Warfare

The topic list above included the item "Future of Warfare." Well, Bilderberg 2026 included THE most important people not only to discuss the future of warfare but also to make these things a reality. Here are some notable attendees.

Markus Laubenthal, chief of staff of Supreme Headquarters Allied Powers Europe.

Supreme Headquarters Allied Powers Europe (SHAPE) is the central military command headquarters for NATO's Allied Command Operations (ACO) and is responsible for directing NATO operations worldwide. Appropriately enough, the head of NATO was there as well.

Mark Rutte, NATO Secretary General

In short, you have attendees in charge of the most powerful armies, spy agencies, and military alliances in the world, all in one place. And they're sitting with people like this:

Alex Karp, CEO of Palantir Technologies.

The impact of Palantir Technologies on the modern world cannot be overstated. In the past years, this massive big data corporation has worked with the CIA, the DHS, the NSA, the FBI, and the CDC. Palantir is extensively used in the military and intelligence agencies of multiple countries, including Denmark, Norway, Germany, France, Ukraine, Israel, and the Netherlands.

Palantir is also used to monitor the masses and gather troves of information about them. For instance, during 2021, NHS England used Palantir technology to analyze the operation of the COVID-19 vaccination program.

Keeping this fact in mind, here's another immensely powerful Bilderberg 2026 attendee:

Albert Ourla, Chair and CEO of Pfizer Inc.

x to a few years ago: Multiple countries barred their citizens
; or even entering public spaces unless they were injected with

an approved Pfizer product.

How do you think such a dystopian plan – which requires careful coordination between governments, tech companies, and pharmaceutical companies – even came to be? With meetings such as Bilderberg.

And when a plan is hatched at Bilderberg, the next step is to sell it to the masses using elite-controlled media.

Controlling Journalism and Entertainment

When decisions are taken at a high level, especially when they go against the best interests of the masses, the media is used to force them to swallow the pill. For this reason, "journalism" must be controlled. With that said, here are some attendees at Bilderberg 2026.

Anne Applebaum, Staff Writer, The Atlantic.

John Micklethwait, Editor-in-Chief, Bloomberg LP.

Zanny Minton Beddoes, Editor-in-Chief, The Economist.

Every year, a high-level representative of the publication The Economist is present at the Bilderberg meetings. Oddly enough, at the end of every year, The Economist publishes an issue predicting what will happen the next year. Making "predictions" is rather easy when you sit with those who decide those predictions.

The Economist's "The World in 2026" cover makes cryptic predictions regarding the economy, politics, and global conflicts (read my full article about it here). If you look carefully, the cover includes a boat from ancient times that could be Persian. Did The Economist predict the war in Iran months before it happened?

Beyond journalism, the elite also needs to control entertainment. And, of course, heads of massive media conglomerates were present at Bilderberg 2026.

Gerhard Zeiler, President, Warner Bros. Discovery International.

x

Warner Bros. Discovery is a gigantic media conglomerate that controls an inordinate proportion of media outlets (simply scrolling through its list of assets is a workout). Gerhard Zeiler is the President of the division called Warner Bros. Discovery International, which controls assets such as CNN International, Animal Planet, Boomerang, Cartoon Network, Discovery Channel, HBO, TLC, TBS, and TNT.

Beyond legacy media, the general population is increasingly getting information and forming opinions using AI. Of course, nearly all the main figures relating to AI were at Bilderberg 2026.

Controlling AI

An already enormous proportion of the general population uses AI for multiple purposes, from asking random questions to performing work tasks to engaging in an all-out romantic relationship with a chatbot. And you better believe the elite wants AI companies to align with its agenda and shape their LLMs to fit its requirements.

Keeping that in mind, here are some more Bilderberg attendees.

Demis Hassabis, Co-Founder and CEO of Google DeepMind.

Jack Clark, Co-Founder of Anthropic PBC.

Jack Clark, the co-founder of Anthropic, owns Claude, an extremely powerful LLM that is profoundly changing how entire industries operate. Furthermore, Claude is also used at the highest levels of military and government.

X 24, Anthropic partnered with Palantir and Amazon Web Services to model to U.S. intelligence and defense agencies. As of February 2026,

Anthropic's partnership with Palantir makes Claude the only AI model used in classified missions."

Yes, Anthropic partnered with Palantir, which is also represented at Bilderberg. Do you see how that works?

Among the other Bilderberg guests, there are bizarre stories that reek of elite corruption. Here's an example.

That Sus Company

Iryna Terekh, CEO and CTO of Fire Point LLC, was at Bilderberg.

Fire Point is a Ukrainian defense technology company headquartered in Kyiv. Founded in 2022 in response to the Russian invasion of Ukraine, it specializes in the design, development, and production of long-range strike drones and cruise missiles.

However, the company's story is rather bizarre and suspect.

For starters, Fire Point **began as a casting agency for film and television**. Even stranger: That company worked on a 2016 romantic comedy starring Volodymyr Zelensky, before he became the president of Ukraine.

A few years later, Fire Point operates across 30 secret sites and sells billions of dollars' worth of long-range drones to Zelensky's government.

How could such a pivot occur, and where did the billions in funding come from? Through secret conferences such as Bilderberg?

In Conclusion

In addition to the incredibly powerful people mentioned above, Bilderberg 2026 also included the U.S. Secretary of the Interior, the Chair of Spotify, the Chair of Goldman Sachs International, and the literal King and Queen of the Netherlands, among dozens of others.

And despite the presence of representatives from numerous "news" sources, not a single "news" source reported on the event, let alone even mentioned its existence. This blatant and coordinated media blackout is proof that massive, global conspiracies do exist and occur right in front of us.

These media sources do not exist to inform us; they exist to keep us dumb, angry, and divided. And boy is it working.
